MSU is side by side with both Wayne State University and University of Michigan in making breakthroughs in the automotive industry as part of the Anderson Economic Group for the University Research Corridor (URC).

Funding
Universities involved with URC have spent $300 million on research, 2/3 of which was funded by the federal government.

Mission
Researchers focus on topics such as safety, quality, engine efficiency, and fossil fuel use.

Degrees
3,600 degrees in auto-industry fields are granted per year from URC universities.

MSU
MSU leads the universities in biofuel research!

Today at Akers there will be an evacuation drill, sprinkler inspection, and fire alarm inspection.

The University Stores Service Counter will be closed all of today for inventory.

Starting in the fall, 2 classes in the College of Education will be using iPads in classroom instruction! The Center for Teaching and Technology is making 60 iPads available for this learning opportunity. Since so many schools are now expanding their technology in the elementary, middle school, and high school setting, it will be a relevant program for the students to get a head start and new ideas.
