RHS Strategic Plan Imperative:
Create student life by providing diverse spaces for globally minded, 24/7 student that is uniquely MSU.

Big News
The entire MSU Surplus Store Department (including Recycling, Bikes, Storage, and Books) has recently joined the new Infrastructure Planning & Facilities unit of MSU – specifically the Sustainability Department. Now, they can combine their efforts with Be Spartan Green to create a bigger presence on campus and in the community!

Fruit and Veggie Month:
Adding Flavor!
Try these tips to add flavor to your veggie side dishes at dinner tonight:
- On roasted or steamed veggies such as broccoli, Brussels sprouts, or zucchini, add a sprinkling of garlic or onion powder in place of salt or butter for flavor.
- Try adding a dollop of plain Greek yogurt instead of sour cream or butter to a baked potato! Top with some fresh chives and pepper in place of salt.

Fun Fact in History
The first bar code scanner (as we know it now) was installed at Marsh’s supermarket in Troy, Ohio in June of 1974. The first product to have a bar code included was a pack of Wrigley’s gum. The pack of gum and receipt are now on display in the Smithsonian Institution.

Today at Hubbard Hall, there will be a fire alarm inspection and sprinkler inspection.
