**Workplace Safety**

Accidents in the workplace occur approximately 1.6 million times a year. Common workplace accidents include:

- Trips, slips and falls
- Lifting accidents
- Falls from heights

Prevention is the best way to occurrence of common workplace accidents:

- Cleaning up the floors of spills
- Installation of adequate lighting
- Clearing workspaces of clutter
- Make sure that ladders, etc. used for climbing are secure
- Workers who engage in repetitive motions in their jobs should take a break in order to stretch and relax their joints and muscles in order to prevent repetitive strain injuries and prevent the risk of fractures.
