“It is not enough just to expect the people at the very top of the organization to come up with the creative thinking and concepts – for a company to be truly creative operation, everyone on the workforce has to be empowered and tuned in to the need to take an innovative approach.” - James Caan

Over the summer, MSU’s Munn Ice Arena made renovations to help MSU conserve energy and allow the fans to see the excitement better. Munn Ice Arena is the first rink in the United States to be equipped with the LED lights! The lights will use about one-fifth of the energy that is currently being used. Because the LED lights produce little or no direct heat, the ice making process doesn’t have to work as hard! To read more about these renovations, click here or check them out at this year’s Green and White Game this Saturday at 5 p.m.

The MSU Computer Store has expanded their hours! They are now open 7:30 a.m.-5:30 p.m. Monday - Friday!
