SAP GUI installation for RHS Employees:

The instructions on ebs.msu.edu describe how to install the SAP GUI if you are an administrator on your computer. However, most RHS users are not. Non-administrators will need to use a shortcut prepared for RHS users in order to install the SAP GUI. Here’s what to do:

1) Double-click on the "SAP GUI Install" shortcut located in your Novell-Delivered Applications Window. (There will be a time period of up to 60 sec when nothing appears to be happening.)

2) Wait for the screen below to appear. Click “Next >” (DO NOT click on "Click to Reboot")

![SAP NetWeaver Front-End Installer](image)

This wizard will help you install package msusapgui720.

Please close all SAP applications and click 'Next' to proceed.

⚠️ Your system has a pending reboot!

Click to Reboot

---

S:\Info\ComputerInfo\EBS\sap gui instructions.doc
3) On this screen, select msusapgui720, then click on Next.
4) Wait for the installation to complete.

SAP NetWeaver
FRONT-END INSTALLER

Please wait while your component selection is being processed. This may take a few minutes.

Installing
C:\Program Files\SAP\FrontEnd\SAPgui\SAPRTWR.DLL

4%
5) On this screen, click on "DONE."

If you have any problems after the installation, submit a service request at http://is.rhs.msu.edu or call the RHS Information Services Help Desk at 517-353-1691.
